Debt Payoff Tracker

A one-page plan for a small or irregular income.

juicytipz.com - from "How to Pay Off Student Loans on a Low Income"

The order of operations

1. Every minimum, on time. Put each loan on autopay right after your most reliable paycheque.
2. A small buffer before anything extra. A missed payment costs more than interest saves.
3. Every extra dollar to ONE loan - the highest rate first - until it is gone, then the next.
4. Split windfalls and raises by a rule you wrote down before the money arrived.

Your loans

Loan	Balance	Rate %	Minimum	Order

The monthly log

Month	Minimums paid	Extra to target	Interest paid	New balance

General information about how repayment works, not financial advice. Fill in your own figures.
Check your servicer's record before acting on any balance, rate or payment shown here.
